SCREEN 2: TELEMETRY PERFORMANCE LAB

earlier than your teammate into Turn 4. Carry more speed in."

SCREEN 3: RACE SIMULATOR & STRATEGY ENGINE

noise to the pace.
5. It spits out the final standings distribution.

Engineering Interpretation

If the engine recommends pitting on Lap 20 for Hards, but the Win Probability is only 15%, the strategist knows they are in a losing position. They can use the What-If controls to test a high-risk "Soft tyre on Lap 45" strategy. If that jumps the Win Probability to 25%, the engineer will take the risk.

SCREEN 4: 3D SPATIAL INTELLIGENCE

SCREEN 5: JARVIS ENGINEERING INSIGHTS

5. TYRE INTELLIGENCE

6. HOW PITWALL THINKS

7. FOLLOW THE DATA (TRACING OUTPUTS)
